AI-Generated Summary

Okay, I understand. Here's how I would respond to those voice screening results: "These results suggest that there might be some changes happening in your neurological health, and it's showing as a higher risk score right now. Because we've also seen a shift in your recent scores, it would be a really good idea to chat with a doctor soon just to explore what might be going on. They can give you a clearer picture and offer the best guidance."
